USER GUIDE:

INSTRUCTIONS FOR USE:

- Please check with your medical team for an appropriate transition regimen if switching from a commercial enteral formula to Liquid Hope Peptide Berry Medley. You may need to transition slowly over the course of 7-10 days to allow the body time to adapt to differences in the formulas.
- Liquid Hope Peptide Berry Medley has a 12 hour ambient room temperature hang time.
- Store unopened formula at room temperature for up to 2 years.
- Once opened, the formula can be refrigerated in a sealed container and used within 48 hours.
- Water may be added. If adding water or any liquid, it must be reblended with the product to emulsify in order to prevent separation.
- The formula can be eaten orally. Many enjoy it when heated on the stove and eaten as a soup or when mixed with fruit and ice to create a smoothie.

SPECIAL NOTES:

*mL range is given due to the volume being effected by viscosity, altitude and temperature. For the most accurate measurements please use the grams listed. All nutritional information contained herein is calculated using a 341/per pouch gram weight measurement.

**DRI% is developed by the Institute of Medicine that refers to set levels of nutrients to meet the nutrient requirements for adults 18 and older. We recommend that you follow your physician's or dietitian's recommendations for the volume of formula necessary to meet both your macro and micronutrient requirements.

Liquid Hope Peptide Berry Medley undergoes regular nutritional assessment and lab testing. However, as with any real food product, variations in the nutrient levels can vary depending on time of year, soil, and weather conditions. Although we do our best to provide you with the most accurate nutrient information as possible, if you have a medical condition that requires you to be precise with specific nutrient levels, please discuss the use of this product with your medical team.
